**ENERGY AUDITING AS A FIRST STEP FOR EFFICIENT ENERGY  
MANAGEMENT - A FOCUS ON BUILDINGS**

**JAUME MATA, BARCELONA UNIVERSITY**

**DIPLOMA THESIS**

**TEI OF CRETE, ENERGY & ENVIRONMENT DPT.**

**Summer 2003**

## TABLE OF CONTENTS

---

<b>1. Building energy auditing and management policy issues .....</b>	<b>3</b>
1.1. The EU policy approach and respective legislation .....	4
1.2. Notable world wide best practices.....	12
1.2.1. The Energy Star approach in the US.....	12
1.2.2. BREEAM UK/Canada.....	13
1.3. Energy labels and standards.....	15
1.3.1. Energy labelling for appliances.....	15
1.3.2. Energy Labelling for buildings. ....	17
1.4. Energy auditing and EMS standards. The ISO 14000 and the EMAS standards. ....	19
<b>2. Energy auditing process and related indicators. ....</b>	<b>23</b>
2.1. Definition and models. ....	24
2.1.1. Definition .....	24
2.1.2. Models .....	26
2.2. Process and methodology .....	30
2.2.1. Standard procedures.....	30
2.2.2. Building Energy Auditing versus Building Simulation .....	37
2.2.3. Industrial Energy Audits .....	39
2.3. Indicators and typical energy saving measures.....	42
2.3.1. Energy efficiency indicators .....	42
2.3.2. Typical energy saving measures.....	46
2.4. Literature case studies .....	54
2.4.1. Building case study .....	54
2.4.2. Industry case study.....	57
<b>3. Review of Energy Auditing Tools.....</b>	<b>61</b>
3.1. The GEM tool, for energy auditing purposes.....	64
3.2. The Energy Plus tool, for energy simulation purposes. ....	71
3.3. Comparative study and conclusions .....	77
<b>4. Case study. ....</b>	<b>78</b>
4.1. Definition .....	79
4.2. Selection and adaptation of tools.....	80
4.3. Results and Conclusions.....	81
<b>5. Literature .....</b>	<b>82</b>
